

## DRAFT AGENDA

1. Introduction by DG SANTE
2. Presentations from stakeholders and Member States on their findings, experiences and achievements to mitigate the presence of mineral oil hydrocarbons in food, following Commission Recommendation (EU) 2017/84 and the statement of the SC PAFF of 21 April 2022 on the enforcement of mineral oil hydrocarbons in food. For commodities for which stakeholders consider that the draft maximum levels, as proposed in SANTE PLAN 2023/2345, could currently not yet be achieved when using good practices, a clear justification should be provided on the sources of the contamination and why these sources cannot be mitigated yet. For those cases food business operators should provide a time plan for avoiding the contamination in the near future and a representative set of raw occurrence data, which were obtained using the currently best available practices.
3. Discussion
4. Any other business
